SUMMARY

AI engineer with a Bachelor of Engineering (Honours) in Software Engineering from the University of Queensland. Founded and led engineering for an AI agent platform, taking it from a from-scratch prototype to paying pilots and A\$100K ARR. Experience across agent systems, retrieval-augmented generation and vector search, and currently tutoring pattern recognition and deep learning at UQ.

SKILLS

Languages: Python, Java

Machine learning: PyTorch, TensorFlow, pattern recognition, retrieval-augmented generation (RAG)

AI systems: LangGraph, Model Context Protocol (MCP), multi-agent systems, prompt engineering

Data and infrastructure: Milvus vector database, Docker, Apify

Engineering: full-stack development, taking a product from prototype to pilot

EXPERIENCE

Tutor, The University of Queensland

Jul 2026 - present

St Lucia, Queensland, Australia

- Tutor COMP3710, Pattern Recognition and Analysis, teaching deep learning practice in Python, PyTorch and TensorFlow.

Founder and CTO, Gödel

Apr 2025 - Dec 2025

godel.sh

- Built a platform for creating Gödel agents (arXiv:2410.04444), from a from-scratch prototype through to customer pilots.
- Gave those agents access to any software-based tool through the Model Context Protocol, removing the need for a bespoke integration per tool.
- Led full-stack development and the engineering team, clearing A\$100K ARR through org-based usage.

AI Engineering Intern, AGAILE Inc.

Jan 2025 - Mar 2025

Delaware, United States

- Prototyped a question-answering solution with LangGraph.
- Crawled website data with Apify and indexed it into a Milvus vector database running on Docker.
- Answered questions over that index using retrieval-augmented generation.

AI Solutions Intern, Segment X

Jul 2024 - Dec 2024

St Lucia, Queensland, Australia

Tutor, The University of Queensland

Jul 2023 - Dec 2023

St Lucia, Queensland, Australia

- Tutored CSSE2002, Programming in the Large, covering Java and software design.

EDUCATION

Bachelor of Engineering (Honours), Software Engineering

Feb 2022 - Jun 2026

The University of Queensland, St Lucia, Queensland, Australia

WRITING

- Building a City Digital Twin, on what a city model can honestly claim. Series, 2026
- Building a Retrieval Agent with LangGraph, template to deployed assistant. Series, 2024 to 2025
- Building a Universal Assistant with LangGraph and MCP. 2025
- Building a Software Engineering Agent with LangGraph. 2025
